ikea!

- blue and yellow working well
- really screams ikea
- full blue screen might be overwhelming
    - so maybe keep white background
    - try add yellow, blue. red stripes/shapes to add color? but maintain the white minimalist vision
    - experiment more with colors
- weave in images within text, not just on top
    - maybe they're to the left as you scroll
    - try experimenting
